

Barrel Lights - for low energy underwater and feature lighting

Barrel lights use 5w high power l.e.d.'s for genuine spotlighting capability, using Luxeon high output l.e.d.s in a choice of warm white and blue. They are IP68 rated for submersion in water up to 2m deep, for lighting in water features (photo left) or on the optional *L11901* spike to uplight features. Barrels are constructed in cast aluminium in silver or black marine-grade anodised finish with a stainless steel "U" bracket. Options include longer cables for underwater use (to avoid underwater joints). A 5w Barrel is roughly equivalent to a 35w halogen lamp.

Dimensions: 80mm L x 55mm diameter; bracket 60 x 75 mm
Power Consumption: 5w Barrel: 6.2w
Operating voltage: 10-28v AC

Stock models:

- L11308/6m** Black Barrel c/w 5w wide blue led & 6m cable
- L11356/6m** Silver Barrel c/w 5w wide blue led & 6m cable
- L11357/6m** Silver Barrel c/w 5w wide warm white led & 6m cable
- L11901** Stainless steel ground spike
- L11902** Stainless steel ground spike with 25cm extended stem

Above: Black Barrel light with optional 25cm extended stem and glare shield
