The Elipta tree mount spotlight system

E4171 on E4012R mount straps onto small branches

E4171 on E4012R screw-on mount

The Elipta strap-on tree mount spotlight system consists of five strap sizes and **E4013R** strap-on tree mount which converts the **E4171** rustic brown Compact spotlight to a tree-mount spotlight. MR16 60° lamps offer the widest beam angle options for moonlighting and canopy uplighting applications: led modules may be used as a low energy option, with a **MR16ASL** spread lens which widens the beam for greater coverage. Tree straps loop over threaded studs on the strap-on mount and will stretch to fit around branches or trunks to provide secure mounting and flexibility for growth. Washers and wing-nuts are provided to secure the strap in place on the mount studs. **E4010** honeycomb glare louvre may be fitted behind the lens to reduce the visibility of the light source and reduce glare, while the **MR16AMDF** moonlighting (pale blue) filter may be clipped onto the lamp inside to provide a cool lighting effect. **E4013R** screw-on tree mount caters for mounting on large trunks or trellis structures and can be strapped onto small branches with two standard tree straps.

Twin spotlight mounting

Uplighting a canopy: a locking nut holds the spotlight in place

Moonlighting is the effect created by lighting downward from low power lights in a tree to shadow the lower branches and foliage onto the ground below. This subtle, dappled lighting effect over a tree seat, lawn, patio, path, drive or border is one of the most natural lighting effects in a garden

Uplighting a tree complements moonlighting to provide a more three-dimensional lighting effect

Filters and lenses

E4010	58mm honeycomb glare louvre - Black
MR16ASL	Clip-on 50mm Spread Lens
MR16AMDF	Clip-on 50mm Moonlighting (pale blue) Filter

Allow 50cm for strap-on mount when selecting strap size

MR16AMDF moonlighting filter provides a cool lighting effect

B9401 35-105w watt weatherproof electronic transformer can be strapped to branches; it powers 5 x 20w, 3 x 35w or 2 x 50w halogen lamps. For led modules use magnetic surface mount transformer or 12v dc power supply >

Tree spotlights require T9962 cable joint kit to connect to low voltage cable unless using a junction box accessory.
