

Microspot Spike

Microspot Spike is a miniature 12v adjustable spike spotlight for use in containers and urns using a MR11-20-36 20w lamp. The low energy option is a MR11-LED1WW warm white 1 watt led module. It is supplied as standard with a 180mm slim rod spike; the optional E4005 50cm extended stem makes it ideal for crosslighting when tucked into foliage or for uplighting through herbaceous planting. M1016 35mm glare louvre is optional.

E4115	Microspot spike spotlight - 316 Stainless steel - 12v
E4125	Microspot spike spotlight - Copper - 12v
E4135	Microspot spike spotlight - Black - 12v

< Copper Microspot weathers naturally within just a few weeks

12v **20W** **LED** **IP66**

12v spike spotlights require T9962 cable joint kit to connect to low voltage cable

Microspot Spike is perfect for discrete lighting of small subjects such as phormiums in containers or borders
