

# 12v miniature spotlights and downlights for pergolas, arbours & gazebos

**Microspot Wall** provides adjustable spotlighting for small features, dining areas and climbing plants as well as grazing down pillars and pergola piers to emphasise structure. This 12v model accepts a MR11 20w halogen lamp or a 1w high output white led module. The front bezel unscrews for easy lamp changing or to fit a E4011 36mm honeycomb glare louvre. The flush lens keeps the glass cleaner longer and is easier to clean periodically. The base mount incorporates rear cable entry into a termination space and can be rotated on the back plate to achieve exact positioning.

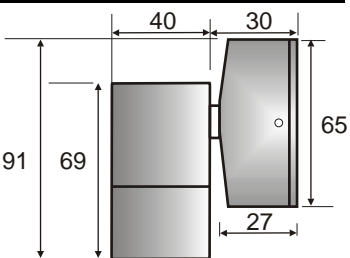

Microspot wall spot	
E4215	Stainless steel
E4225	Copper
E4235	Black
E4165	Textured brass

**Microspot Down** provides discrete illumination from walls, beams and canopies or for grazing down gate pillars, pergola piers and textured surfaces. This 12v model accepts a MR11 20w halogen lamp or 1w high output white led module combining warm white light, low energy consumption and long lamp life. Microspot Down is the most compact solution for discrete downlighting onto small features or areas from a miniature light fitting.

There is space inside the spotlight body to fit an E4011 36mm honeycomb glare louvre. The front bezel can be unscrewed without use of tools to make it easy to change the lamp without tools. The flush lens keeps the glass

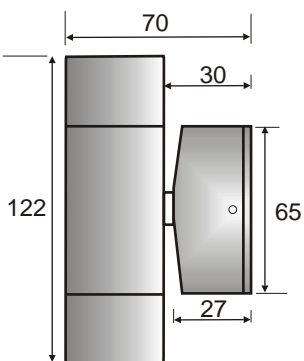

cleaner longer and is easier to clean periodically. The base mount incorporates rear cable entry into a termination space and can be rotated on the back plate to achieve exact positioning.

Microspot wall downlight	
E4315	Stainless steel
E4325	Copper
E4335	Black

**12v 20W LED IP66**

**Microspot Up/down** provides a combination of downlighting with a decorative uplighting effect for applications such as up and downlighting from pergola columns to provide ambience around a patio area. This 12v model accepts a MR11 20w halogen lamp or 1w high output white led module
