

# 12v Hanging Downlights

12v  
35w  
LED  
IP44

**Pergolight** is a small 12v MR16 20-35w downlight for illuminating a seating area or feature below a tree, arbour or pergola. It has an open base and accepts a clip-on MR16 accessory, such as a spread lens over a hanging basket, a frosted lens or glare louvre over a seating area or a moonlighting filter for hanging from trees. **Pergolight** is available in natural copper (which weathers naturally), lacquered copper (which resists tarnishing) or silver, brown and rustic brown powder-coated aluminium. Use a 20w 60° MR16 halogen lamp or **MR16LED3WW** i.e.d. lamp for subtle lighting. (Order separately)

**Decorative downlights** are available in two lengths with a perforated barrel which combines a downlighting beam with pinpoints of light through the side to add fun and sparkle to a garden lighting scheme. **Sparkle** and **Twinkle** models may be used as downlighters over a table, along a pergola walkway or hanging from tree branches. They have a 1m cable, an open base and can accommodate a clip-on MR16 accessory such as a frosted lens, glare louvre or colour filter. A 20w 38° halogen lamp or **MR16LED3WW** i.e.d. module is recommended (order separately).

12v Hanging downlights have a 1m cable & require a T9962 cable joint kit to connect to the end of a low voltage cable or a T9963 cable splice kit to connect into a cable run

## Energy Rating

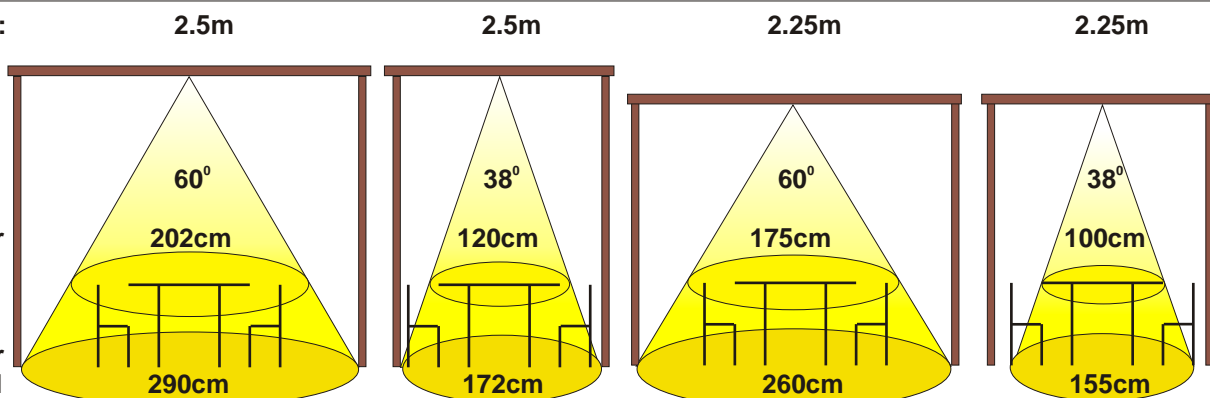

- A** 12v L.E.D. LAMPS
- B** HALOGEN POWERSAVERS
- C** 12v HALOGEN LAMPS

Pergola height:  
**Lighting example**

Lamp beam:

Beam diameter @ table top  
75cm high

Beam diameter @Ground level

Decorative hanging lights with longer barrels reduce beam diameter to 60cm @ 2.25m mounting height
