

Elipta ERL005-06C Cygnet 11.7w 12v 3000K LED Spotlight 815 lumens – IP65

The Elipta Cygnet is a small, versatile, spike spot light with a 27° beam angle and a powerful 815 lumens output making it a neat option for lighting large shrubs and small trees up 10m in height. Built in glare shield helps to hide the light source from view. Easy to install on soft ground with black polycarbonate spike (supplied) or fix directly to a wall or paving via stirrup bracket

PHYSICAL DATA

- Black powder coated aluminium body with a stainless steel mounting bracket
- Impact resistant glass lens
- 105mm in diameter and 60mm deep, the light stands 135mm high including bracket
- IP65 rated

ELECTRICAL DATA

- 12v for connection to an AC transformer or DC power supply (sold separately)
- 6 x 2w 3000K CREE warm white LEDs producing a combined output of 815 lumens
- 27° beam angle
- Supplied pre-fitted with 2m of two core HO5RN-F 0.75mm² rubber cable

INSTALLATION

Can be mounted directly to a wall or paving with the stirrup bracket or in soil using the supplied polycarbonate spike mount.
