

# RGBCCTGU104 - GU10 RGB + CCT 4w Lamp

## Description

RGBCCTGU104 4w Lamp is a high quality RGB GU10 LED with 16 million colours to choose from, as well as fully adjustable brightness control, colour saturation plus the ability to seamlessly change the colour temperature of the white from 2700K (Warm White) to 6500K (Cool White).

It has built-in WIFI, controlled by an RGBCCT092 controller. The RGBCCTGU104 offers you complete customisation without the need for extra wiring installation.

The RGBCCTGU104 comes with 10 colour changing sequences.

This product must be used with the RGBCCT092 controller.

clicks	sequence
1	Colour change fade effect
2	White pulse
3	Colour change pulse effect
4	Colour change switch effect
5	'disco'
6	Red pulse and flash
7	Green pulse and flash
8	Blue pulse and flash
9	White pulse and flash

## Installation guidelines

Put the LED lamp in any suitable fitting, power off then power on. Within 3 seconds touch the 'zone-On' buttons quickly 3 times. Once the LED lamp flashes green set up is complete. To un-link repeat this process but press 'Zone-On' 5 times. The lights will now flash red.

When installing 2 or more lights this process must be performed collectively with all lights in the same zone.
