

EH8464LED-650- Polar Bollard Light - Square - Graphite - Warm White LED

Description

The Elipta Polar bollard light is a 9w 3000k 240v bollard light, with LEDs hidden from view and sealed inside a square, polycarbonate lens. Emits glare free lighting along paths, driveways, terraces, and around decking areas. The bollard may be bolted to paving or fixed to decking using anchors supplied, or the anchors can be set into wet concrete. For soft ground use optional EHSQUARE Ground Spike, (purchase separately).

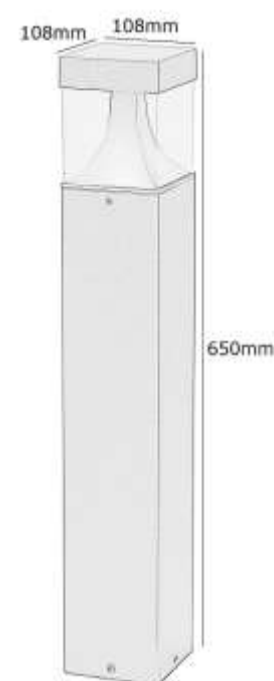

Electrical	240v 9w warm white 3000K 370Lm Built-in LED array
Colour/ Finish	Graphite Grey powder-coated pre-treated aluminium
Exterior Dimensions	650mm tall x 108mm wide

240v	Wide beam	
IP54	Built-in LED	Pre-wired 2m

Pre-wired with a 2 metre HO5RN-F silicone core rubber cable for connection via T9969 underground joint kit: the installer may shorten the fitted cable to make a weatherproof connection inside the base of the light.

Using a single RCD for large numbers of 240v fittings is not recommended due to the risk of nuisance tripping. We advise the use of separate RCD protection for each circuit and a maximum of 12 fittings per RCD. Where a garden lighting installation of more than 12 spike mount or recessed lights per circuit is proposed, we suggest the installation of 12v units with transformers, which results in a significantly higher fault tolerance and reliability in the total installation.

2 YEAR WARRANTY

Exclusions: Damage by machinery, animals or the use of incorrect cleaning materials. Corrosion due to exposure to salt or chlorine. Damage due to incorrect installation practices. Responsibility for 3rd party cost, indirect or consequential loss
