### Picture Touch Panel

**Part No. LS30400WTS**

**Features**
- Completely wireless
- Touch-glass over your background image
- Add up to 30 'touch buttons'
- Position buttons anywhere
- 3 button sizes
- Easy setup
- Standard ‘AAA’ batteries give long >2 years life.
- Flush or surface mount
- Landscape or Portrait

**Description**

The wireless picture touch-panel provides an easily customised user-interface to Light Symphony. Like an ordinary picture frame; simply place your own photo, design or artwork behind the glass to create an intuitive, bespoke, wall-mounted, control centre.

By holding your finger on the glass you can create touch-buttons where you want them. Hang it on the wall or flush-mount it using the optional wall-box for the ultimate wow factor.

Download the Microsoft Word template from our web-site to simplify creating the background image.

Its 1000 meter range provides a robust link to the garden or base station repeater.

</tr>
<tr>
<td>CE Compliance</td>
<td>EN220-300 EN 50081–1 EN 50082–1</td>
</tr>
</tbody>
</table>
**Application Example**

1. Add your picture / artwork…
2. Teach the touch-buttons…
3. Touch to use…
4. Lighting Control Modules respond

**How to use it**

After placing your photo, image or artwork behind the glass, turn the touch-panel over to reveal the small controller on the rear. The LCD display steps you through teaching new touch-buttons and their function; Garden On/Off, Area 1 On/Off, Dim Up/Down etc. Add up to 30 small, medium or large buttons in any position.

Next, simply hang it on the wall all and it’s ready for action! When a touch-button is pressed the unit sends a wireless command, which the outdoor Lighting Control Modules hear and respond to.

If a base-station is installed, it also hears the command and re-transmits it, thereby increasing the range and reliability.

**Accessories**

**Flush Mount Wall Box**

Galvanised box suitable for plaster board fixing using the bend-out tabs or masonry fixing. Touch-panel is depth adjustable and push-fits for easy battery replacement. Depth 25mm
